ASSIGNMENT 0

Let's get familiar with Git first. Read about version control and Configure Git on your laptops.
Note : For Windows machines, use Git Bash.

How to submit assignments?

Through Git of course. This video should help you out.
https://drive.google.com/file/d/1HVPXI-r3sY9pyLTJeIpEItrxOknDARKH/view?usp=sharing

Steps

Fork the repository.

Clone the forked repository using:
git clone https://github.com/ACM-NITK/Security_and_Crypto_SMP_2019.git

Change directory and create a folder with your name.

Inside the folder create a text file with your details.
cd Security_and_Crypto_SMP_2019/'Assignment 0'
mkdir your-name
cd your-name
gedit intro.txt

Add and commit changes. Push it to your repository.
git add .
git commit -m "Your message"
git push origin master

Login to github and send a pull request to ACM-NITK/ACM-CyberSecurity.
To configure upstream:
git remote add upstream
https://github.com/ACM-NITK/Security_and_Crypto_SMP_2019.git
To pull the latest changes:
git fetch upstream
git checkout master
git merge upstream/master

After you send a pull request, it's time for some wireshark installation. It's simple. Just Install Wireshark on your systems. And you're ready for our first session.
Windows : https://www.wireshark.org/download.html
Ubuntu : https://askubuntu.com/questions/700712/how-to-install-wireshark

Good Luck
